## SUMMARY

Full Stack Developer specializing in web applications, mobile apps, and ERP systems. Hands-on experience building production-ready solutions with Next.js, Laravel, Flutter, and Node.js — from concept to deployment. Strong focus on clean code, performance, and delivering systems that work reliably in production.

## SKILLS

### Backend Development

Laravel, PHP, Node.js, REST APIs, GraphQL

### Frontend Development

Next.js, React, TypeScript, Tailwind CSS, GSAP

### Mobile Development

Flutter, Dart, Kotlin, Android SDK, SQLite

### DevOps & Tools

Git, GitHub, Docker, Vercel, Netlify, Windows Server

## PROJECTS

### Restaurant Management System (ERMS)

2025 – 2026

*Enterprise ERP for restaurant chains*

Full-stack ERP system for restaurant chains built with Laravel 11, Filament v3, Flutter, and MySQL. Covers double-entry bookkeeping, real-time stock deduction based on recipes, shift reconciliation, procurement, HR/payroll, and semantic report builder.

### WiFi Monitor Pro

2025 – 2026

*Android network monitoring utility*

Android app built with Flutter and Kotlin to monitor real-time network traffic and data usage across WiFi and Mobile Data. Features a persistent background service, per-app telemetry, custom alert thresholds, and strict security overlays.

### TIF — Luxury Perfume Experience

2025 – 2026

*3D cinematic e-commerce showcase*

A premium 3D cinematic perfume experience built with Next.js, React Three Fiber, and GSAP. Features 60 FPS WebGL rendering, immersive scroll animations, and luxury brand aesthetics matching global perfume houses

## EDUCATION

### Bachelor of Science in Information Technology

2022 – 2026

*National University — Faculty of Sciences & Engineering*

Ibb, Yemen

• Core Coursework: Systems Analysis & Design, Data Structures & Algorithms, Relational Database Management Systems (RDBMS), Object-Oriented Programming (OOP), and Software Engineering.

## LANGUAGES

• Arabic (Native)

• English (Professional)
